

Weekly Environmental Report - Status	Week Ending: Thur. 25 th August 2005
Generated By: Sandra Barber	
Checked By: Leslie Finnegan	

1 Monitoring Data

Note:

***No site personnel have been allowed to access the site.
There is no environmental data available for the reporting period.***

1.1 Rainfall Data

As there is currently no access to site, the on-site weather station data could not be downloaded.

The weather data below is for the Met Eireann weather station at Belmullet.

- Total rainfall was 58.7 mm, with 23.7 mm falling in one day.
- The temperature ranged from 10.5 to 21.3°C

1.2 Summary

Environment	Comments
Surface Water	As there is currently no access to site: <ul style="list-style-type: none"> • In-situ monitoring equipment could not be downloaded. • Water samples could not be taken for issue to the laboratory. Only results available are the Lab results for the 10 th August 2005. Conductivity recorded for SP1 had a value of 556 uS/cm, this exceeds the 500 uS/cm limit set. By the time the results had become available there was no access to the site and therefore no way to assess whether this result was a one off incident on an ongoing issue.
Groundwater	
Noise	
Vibration	
Dust	Dust Pots for July 2005 could not be sent to the lab for analysis. They were taken in and prepared for collection the following week. Access to site was not possible the following week so the dust pots could not be issued. The replacement dust pots have been returned and will be installed when the site can be accessed.

2 Environmental Incidents/Near misses/Complaints

There is no way of knowing what if any environmental incidents have occurred during the reporting period.

Surface Water Monitoring Record Sheet													no... 1 of 1	
Conducted by								Approved by
